Foussana

The Foussana Collection is inspired by the beguiling limestones of Tunisia, which are characterized by monochromatic beige, grey and brown tones and gentle movement of veining and fossils. Foussana replicates these characteristics to the last detail and offers a silky smooth surface finish that feels like brushed stone. Made from durable porcelain, Foussana can be used in showers and other wet environments where many grey and brown limestones are not recommended. Foussana is a perfect surface for interiors both modern and traditional.
