Patterns emphasizing texture, finish, bright color, and shape invigorate spaces with depth and emotion. The Pietta Donovan collection from Walker Zanger is a bold and balanced artful palette of handmade encaustic (cement) and ceramic tiles. Flexible material allows for design possibilities—the dexterity to join, turn, flip and repeat tiles to cater to a variety of aesthetics. Subtle neutrals join bold turquoises, deep navy blues, lush emeralds, a warm manguoid and dusty pink to evoke a familiar yet current sensation.

This handmade collection is ideal for variations of tile: patterns on floors, walls, vertical installations, wet locations, and large-scale hospitality environments.
These patterns are a reimagining of the ’70s psychedelic wallpapers that I grew up around. My father was a painter and paper hanger and there was a lot of wallpaper around me. I grew up in the ’80s and ’90s. There’s so much nostalgia for it now that I wanted to rethink it, recolor it and re-present it in a fresher form.”
Our Pietta Donovan Cement collection are all handmade 1/2” thick tiles.

Usage: interior/exterior walls and floors (not suitable for shower floors)
External use: not recommended for freeze/thaw zones
