

WALKER ZANGER™  
PIETRA GRIS

# Pietra Gris

A cool white background with cloudy gray veins is the foundational palette for the Pietra Gris collection. This line re-interprets natural stone by blending subtle, unique color variations with in striking geometric patterns. Water resistant and versatile enough for residential and commercial applications, Pietra Gris inspires a range of uses and adds a refined element to your design. Equally at home in the kitchen, bathroom or hallway, these mosaic tiles are sure to be a focal point in their chosen setting.

For installation on shower floors on all products, please refer to TCNA guidelines and consult with your installer for proper waterproofing and sealing requirements. All Pietra Gris products are made of natural stone product. We recommend sealing all natural stone products with a penetrating sealer and sealing all porous non-polished stone (limestone, tumbled marble, etc.) prior to grouting. This prevents grout from staining or affecting the color of the stone. Stone is a natural product, and care should be taken to protect it from harsh abrasive cleaners and abrasive cleaning tools. White thin-set or mortar is required for the following: light limestone, tumbled stones, "antiquated stones" and light-colored marbles. It is possible that dry seams, pits, fossils, and glass veins are often filled at the factory. The fill may perhaps leak through the voids. In this case, refilling the voids may be a necessary maintenance procedure. For further questions/information about additional usages, please consult with your installer.

The background of the entire page is a repeating pattern of light-colored marble tiles with dark grey and black veining. The tiles are arranged in a grid, with thin, light-colored grout lines separating them. The overall appearance is clean, modern, and elegant.
