Notes:

- We recommend sealing all natural stone products with a penetrating sealer and sealing all porous non-polished stone (limestone, tumbled marble, etc.) prior to grouting. This prevents grout from staining or affecting the color of the stone. Stone is a natural product, and care should be taken to protect it from harsh abrasive cleaners and abrasive cleaning tools.
- White thin-set or mortar is required: light limestones, tumbled stones, "antiqued stones", and light colored marbles
- Likely identified with dry seams, pits, fossils and glass veins that are often filled at the factory. *The fill may perhaps leak through the voids. In this case, refilling these voids may be a necessary maintenance procedure.*
