	Steam Showers	✓*	✓

Material Data		Cadet Grey	Carrara White
	Color Variation	✓	
	Color Variation		✓
Sealing			
	Must be sealed for use in areas that experience frequent wet conditions		
Cleaning and Maintenance			
	Protect from harsh abrasive cleaners and tools Recommended: Oceanscare or Dry Treat products for all natural stone		

Notes:

- We recommend sealing all natural stone products with a penetrating sealer and sealing all porous non-polished stone (limestone, tumbled marble, etc.) prior to grouting. This prevents grout from staining or affecting the color of the stone. Stone is a natural product, and care should be taken to protect it from harsh abrasive cleaners and abrasive cleaning tools.
- If used for shower floors, must include waterproof membrane on substrate and 12 inches up adjacent walls prior to tile installation.
- White thin-set or mortar is required: light limestones, tumbled stones, "antiqued stones", and light colored marbles

*Steam shower walls only. Use caution when using as flooring other than light traffic residential as this stone has potential to crack
