ADDITIONAL NOTES

For installation on shower floors, please refer to TCNA guidelines and consult with your installer for proper waterproofing and sealing requirements. All Ellington Savoy tiles feature natural stone products. We recommend sealing all natural stone products with a penetrating sealer and sealing all porous non-polished stone (limestone, tumbled marble, etc.) prior to grouting. This prevents grout from staining or affecting the color of the stone. Stone is a natural product, and care should be taken to protect it from harsh abrasive cleaners and abrasive cleaning tools. Use caution when using as flooring in any area that will experience more than light foot traffic as this stone has high potential to scratching. For further questions/information about additional usages, please consult with your installer.
