RUE PIERRE

The classic Parisian Café, with its quaint colorful façade, wicker chairs and wooden is a hallmark of the “City of Light.” If you look down as you sip your Café au Lait, you might notice another common element -the white marble floors - worn to a smooth patina by years of use and scrubbing. This classic flooring is the inspiration for Rue Pierre, a collection of stone tile, carefully brushed to create a surface that hovers between honed and polished, creating a “vintage” patina that has the look of natural aging.

For installation on shower floors on all products, please refer to TCNA guidelines and consult with your installer for proper waterproofing and sealing requirements. All available Rue Pierre tiles are natural stone products. We recommend sealing all natural stone products with a penetrating sealer and sealing all porous non-polished stone (limestone, tumbled marble, etc.) prior to grouting. This prevents grout from staining or affecting the color of the stone. Stone is a natural product, and care should be taken to protect it from harsh abrasive cleaners and abrasive cleaning tools. White thin-set or mortar is required for the following: light limestone, tumbled stones, "antiquated stones" and light-colored marbles. It is possible that dry seams, pits, fossils, and glass veins are often filled at the factory. The fill may perhaps leak through the voids. In this case, refilling the voids may be a necessary maintenance procedure. For further questions/information about additional usages, please consult with your installer.
